## Scenario – Establishing Cohorts

- All 6 students would be included.
- 3 students in the first-time, full-time entering column
  - 1 included as a Pell Recipient
  - 2 included as Non-Pell recipients.
- For the first-time, part-time entering category, there would be 1 student
  - Is a Pell recipient.

# Outcome Measures

## Scenario – Establishing Cohorts

- There would be 1 student in the Non-first-time, full-time entering cohort
  - Is not a Pell recipient.
- The last category would have 1 student, in the Non-first-time, part-time entering cohort
  - Is not a Pell recipient.
  - Note: This student should not be included in the Pell column because even though they were awarded, they were not disbursed any Pell.

## Scenario – 6 Year Screen

- Again, all 6 students will be in the adjusted 2009 cohort with 3 included as receiving awards.
  - Student #3 who earned a Bachelor's degree after 4 years would still have this degree after 6 years, even though they are no longer enrolled.
  - Student #4 is also still included, who earned a Associate's degree after 6 years, however they would be included in the Associate's degree column instead of the Certificate column on the previous screen.
  - Last, Student #5 who earned a Certificate would still be included. They still would have their Certificate after 6 years, even though they are still enrolled, they haven't earned any other awards after 6 years.

# Outcome Measures

## Scenario – 6 Year Screen

- Again, none of the other 3 students had earned an award after 6 years, so they should not be included on this form.
- The Total Awards and the % of the cohort who received an award will be calculated, as well as the total at the bottom.

# Outcome Measures

## Scenario – 8 Year Screen

- For this screen, the same 6 students will be in the adjusted 2009 cohort with same 3 included as receiving awards.
  - Student #3 would still be included as earning a Bachelor's degree after 4 years.
    - This student would not be included in the column where enrollment status is unknown because even though they are no longer enrolled, they did receive an award.
- **Remember: a student should only be included once on this screen.**
  - If they received an award, they would be included in the appropriate column (on the left), otherwise, they should be included in the necessary column for their enrollment status (on the right).

# Outcome Measures

## Scenario – 8 Year Screen

- Student #4 is still included, who earned a Bachelor's degree after 6 years, however they would be included in the Bachelor's degree column instead of the Associate's degree column on the previous screen.
  - This is because you report the highest award earned for each student at each status year. Even though the highest award was an Associate's degree after 6 years, the highest award earned after 8 years is a Bachelor's degree.
- Student #5 who earned a Certificate would also still be included, in the Certificates column since that is the highest award earned after 8 years.

# Outcome Measures

## Scenario – 8 Year Screen

- The other three students who had not earned an award after 8 years would be included as follows:
  - Student #1 who is no longer enrolled would be included in the FTFT, non-pell recipients column as “Subsequent enrollment status is unknown”
  - Student #2 who is still enrolled at your institution would be included in the FTPT, Pell recipients column as “Number still enrolled at your institution”

# Outcome Measures

## Scenario – 8 Year Screen

- Student #6 who is enrolled at another institution, and received Pell is included in the FTFT, Pell recipients column as “Subsequently enrolled at another institution”
  - Note: whether or not a student has earned an award at a subsequent institution does not matter on the OM survey. You should only report those awards conferred at your institution.
- The totals at the bottom highlighted in yellow for Not receiving an award and total awards should add up to the amount included in the adjusted cohort.
