

Reviewing the Certification Report for Funding

After the KSPSD AY collection is submitted and the edits are free of fatal errors, the Certification Report for Funding link will become available in the list of reports at the bottom of the KSPSD tab.

This report is organized by the declared major of the student. Aggregate section hours appear in the columns according to the status of the courses submitted. Course and student level detail can be obtained by selecting the numerical values in red links throughout the report.

Preliminary List of Total Credit Hours Funded versus Total Credit Hours Not Funded By Program Name, Award Level and Award

This report is organized by declared major of the student. The credit hours listed represent the courses taken by those students and not necessarily the courses within that program

*This report is considered Preliminary because the institution can make changes to the data prior to the certification. Please see the final funding report for actual funding hours

Courses funded at the non-tiered rate will appear in the column labeled “Funded (N)”. Select the numerical value in those cells to review the courses that are included– generally there should not be any tiered courses that appear in that list (there are exceptions, but a review will ensure it is correct).

Any tiered courses should be reviewed in the institution's Course Inventory to ensure they are tied or linked to a program. Tiered courses that are not tied or linked to an active program will not be funded at the tiered rate.
